

CASE STUDY

In Their Words

“The infrastructure allocated to us can be adapted according to our needs. CTG’s team also responds to specific requests, such as the encryption of our clients’ most sensitive data—a real plus when you know how important the security of this data is to them.”

– Benoît Moulin,
Co-founder, DOMOS FS

Offering a Secured Cloud Environment to Alternative Funds Managers

The Client

DOMOS FS provides an end-to-end set of solutions dedicated to Alternative Assets Fund Management: Private Equity, Real Estate, Debt, and Infrastructure. Located in Luxembourg, this fintech was created in 2013 and has served more than 30 clients. The company aims to revolutionize the European Alternative Investment Fund Management landscape in the medium term, offering tools to automate processes and reporting in a pragmatic way.

The Challenge

Each client of DOMOS FS is regulated by the CSSF (Commission de Surveillance du Secteur Financier). This means they need to host their data in a highly secured cloud managed by a PSF company (Professionnel du Secteur Financier). DOMOS FS also needs constant support from its cloud provider to be able to quickly address any problem that may occur.

The CTG Solution

With more than 25 years of experience in the financial sector, CTG Luxembourg PSF was able to offer a highly secured, 100% compliant cloud infrastructure. This infrastructure is scalable, which is particularly valuable for a growing company like DOMOS FS. CTG Luxembourg PSF also offered security advice directly to DOMOS FS’s clients, which was greatly appreciated.

Results

The partnership with CTG Luxembourg offered numerous benefits to DOMOS FS, including total compliance with the CSSF Cloud Regulation, a scalable solution that fits the quick evolution of DOMOS FS, valuable security advice, an increase of the overall credibility of DOMOS FS’s solution, and more.
